BEAUTY IS OVERR

JUST DO IT!

The term “creativity” is like a Rorschach—we see what we want to see.

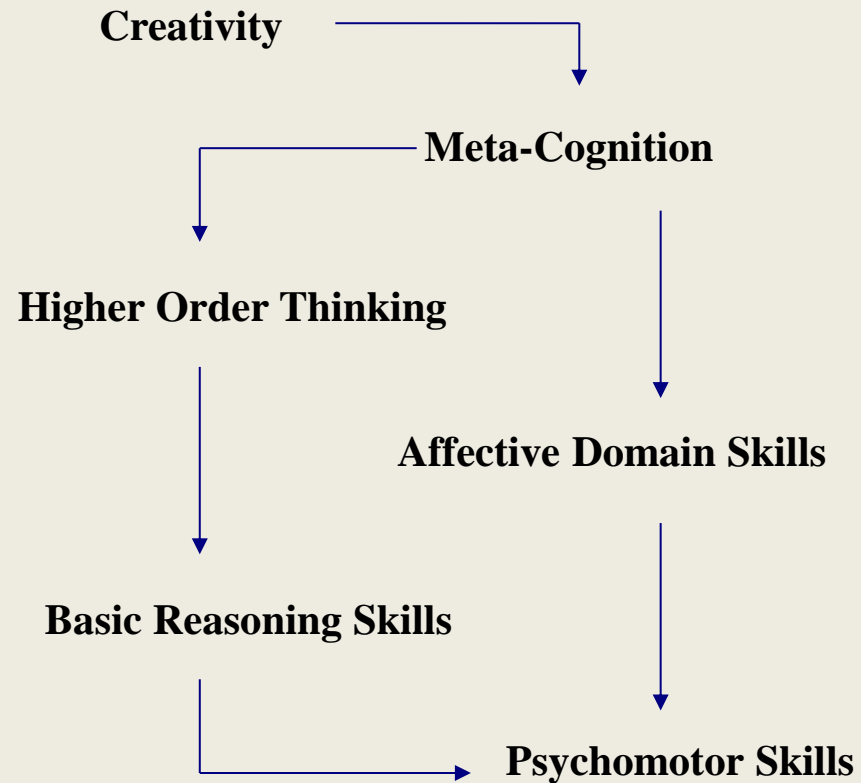

Unpacking the concept based on our model.

# A complex, executive-level cognitive process

- Develops over time
- Not just a whacky way of producing zany ideas

### 3 Stage Model

Risk and Reframe  
Question and Connect  
Mindset and Stance

# Frame Shifting

Two men are playing golf on a lovely day. As the first man is about to tee off, a funeral procession goes by in the cemetery next door. He stops, takes off his hat, and bows his head.

The second man says, “Wow, you are incredibly thoughtful.”

The first man says, “It’s the least I could do. She and I were married for 25 years.”

# Risk and Reframe

When we look at the world, we see that different values are what make it so remarkable. With over 140 years of experience, we use this understanding to serve you better.

# Voice and Vision

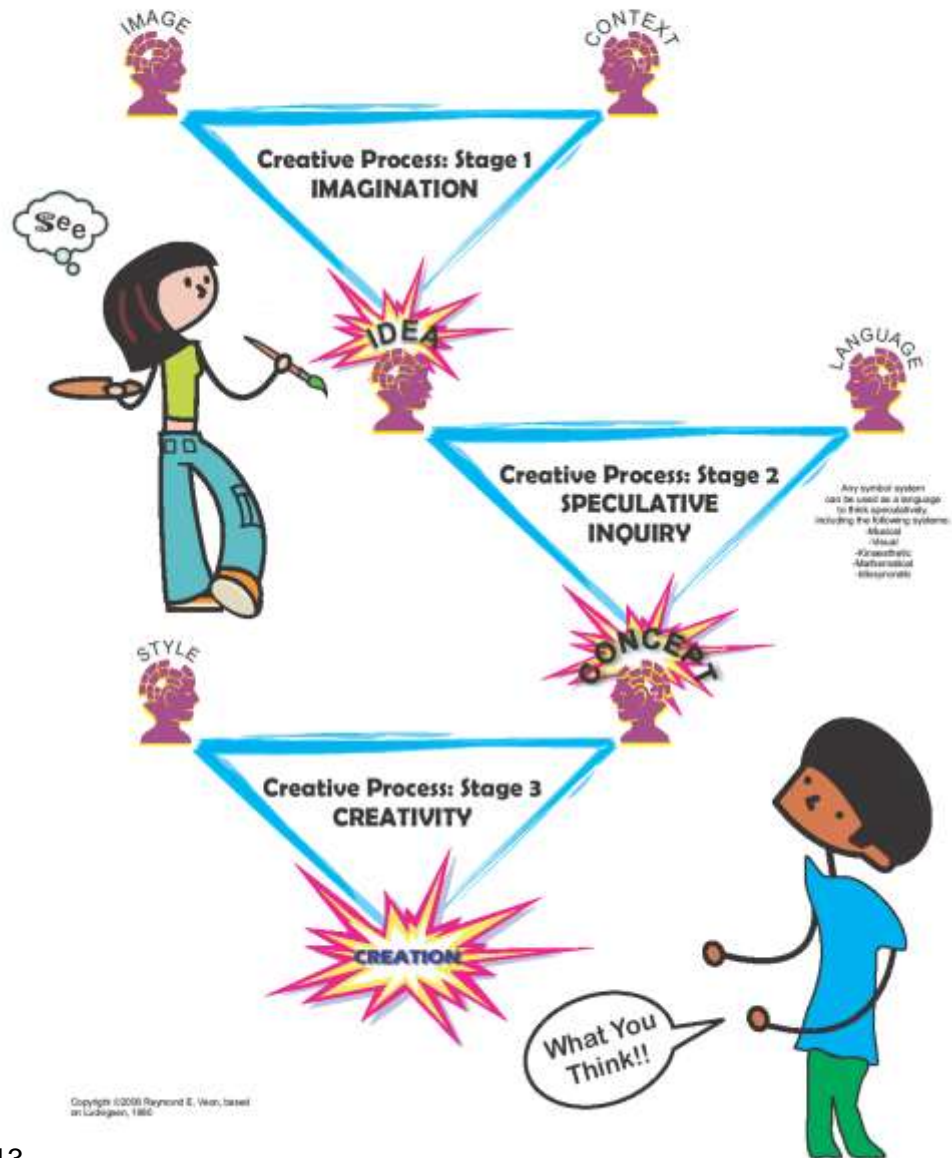

“When stereotypes attempt to take control of their own bodies, they can only do what they are made of and they are made of the pathological attitudes of the Old South.

Therefore, racist stereotypes occurring in my art can only partake of psychotic activities.”

-Kara Walker

## MUSIC

### STAGE 1: IDEA-FORMATION SKILLS

Stage 1 Assessment: Did you risk and reframe?

The student...

S1.1 R Mentally recalls and produces sound images using a variety of materials

S1.2 O Follows prompts inherent in the character of music

S1.3 R Generates multiple interpretations for a musical idea or aural image

S1.4 R Mentally manipulates sound and meaning

S1.5 R Improvises in response to unanticipated insights, deviations or teacher-imposed constraints that reframe experience

S1.6 R Makes multiple representations of a single motive or theme using varied materials, instruments and approaches

S1.7 R Mentally envisions, audiates, what cannot be directly observed, for example by depicting imaginary events,

**CIM Objectives Integrated with Content and Pedagogy in Scope and Sequence**

# Teaching for Creativity: Tweaks and Small Shifts

$$5 + 5 = ?$$

$$? + ? = 10$$

# Synthesizer vs. Creator

“The synthesizer’s goal is to place what has already been established in as useful and illuminating a form as possible. The creator’s goal, on the other hand, is to extend knowledge, to ruffle the contours of a genre, to guide a set of practices along new and hitherto unanticipated directions.”

Howard Gardner, *Five Minds for the Future*, page 98

## CORE VALUES

Identify a time keeper and a recorder (take notes everyone can see)

- **Step #1:** Remember a creative experience you've had –in every detail.
- **Step # 2:** Organize your thoughts.
- **Step #3:** Take turns; in 2 minutes share your creative experience.  
*Recorder:* record the major points in each story.
- **Step # 4:** Find the common themes;  
*Recorder:* record common themes on new piece of paper.
- **Step #5:** Look at the new list of common themes; condense the list to no more than 4 or 5 Core Creative Values that reflect all of your experiences.

# Risk and Reframe

When we look at the world, we see that different values are what make it so remarkable. With over 140 years of experience, we use this understanding to serve you better.

[us.hsbc.com/values](http://us.hsbc.com/values)

**HSBC**   
The world's local bank

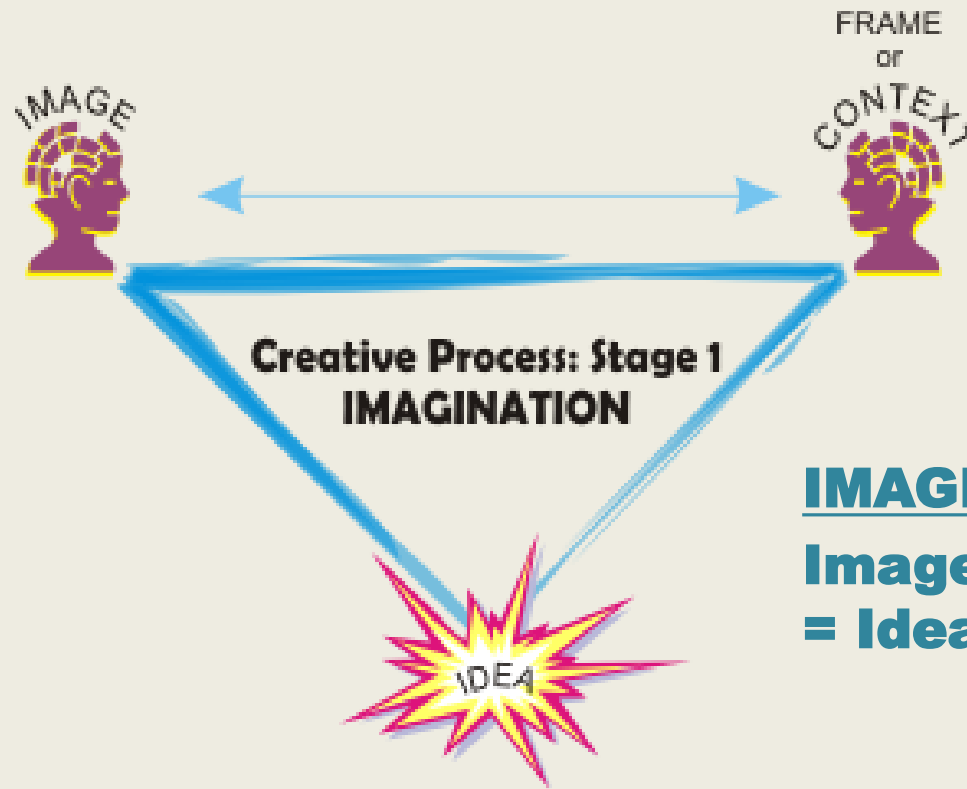

# Frame Shifting

A different point of view is simply the view  
from a place where you're not.

[yourpointofview.com](http://yourpointofview.com)

**HSBC**   
The world's local bank

**IMAGINATION:**  
**Image + Context**  
**= Idea**

**RISK AND REFRAME**

Natural way our mind  
works

Ex: Freedom

Change the image =  
change the idea

Change the frame =  
change the idea

## A Note About...

# SYMBOLS

# BANKSY

# BANKSY

**FRAME SHIFTING REQUIRES RISK**

IT CAN ALSO BE FUN....

pleasure pain

pleasure pain

Open minds are welcome here.

[yourpointofview.com](http://yourpointofview.com)

HSBC   
The world's local bank

OR SERIOUS....

When we look at the world, we see that different values are what make it so remarkable. With over 140 years of experience, we use this understanding to serve you better.

[us.hsbc.com/values](http://us.hsbc.com/values)

**HSBC**   
The world's local bank

"One original thought  
is worth a thousand  
mindless  
- Diogenes"

**SYMBOLS**

# Same Ingredients, Different Recipe

Reframing  
Requires  
Risk...Where will  
it lead?

$$5 + 5 = ?$$

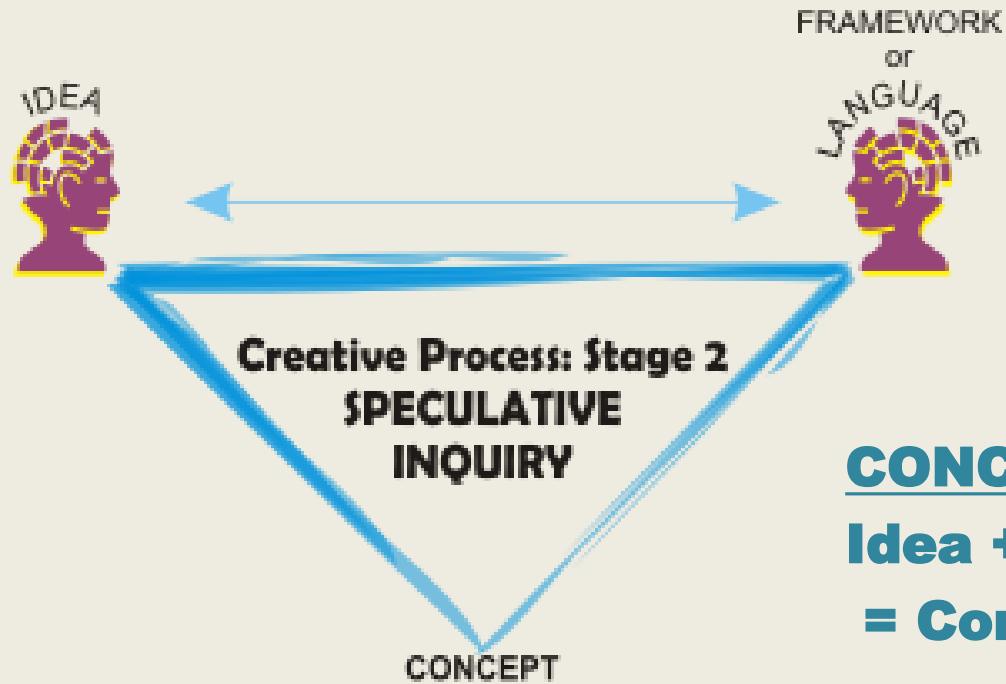

$$? + ? = 10$$

Final product/end state predetermined

- Problem statement or process could be “open”

# So Let's Risk and Reframe!

**CONCEPT:**

**Idea + Framework**  
**= Concept**

**QUESTION AND CONNECT**

# Frame vs. Framework

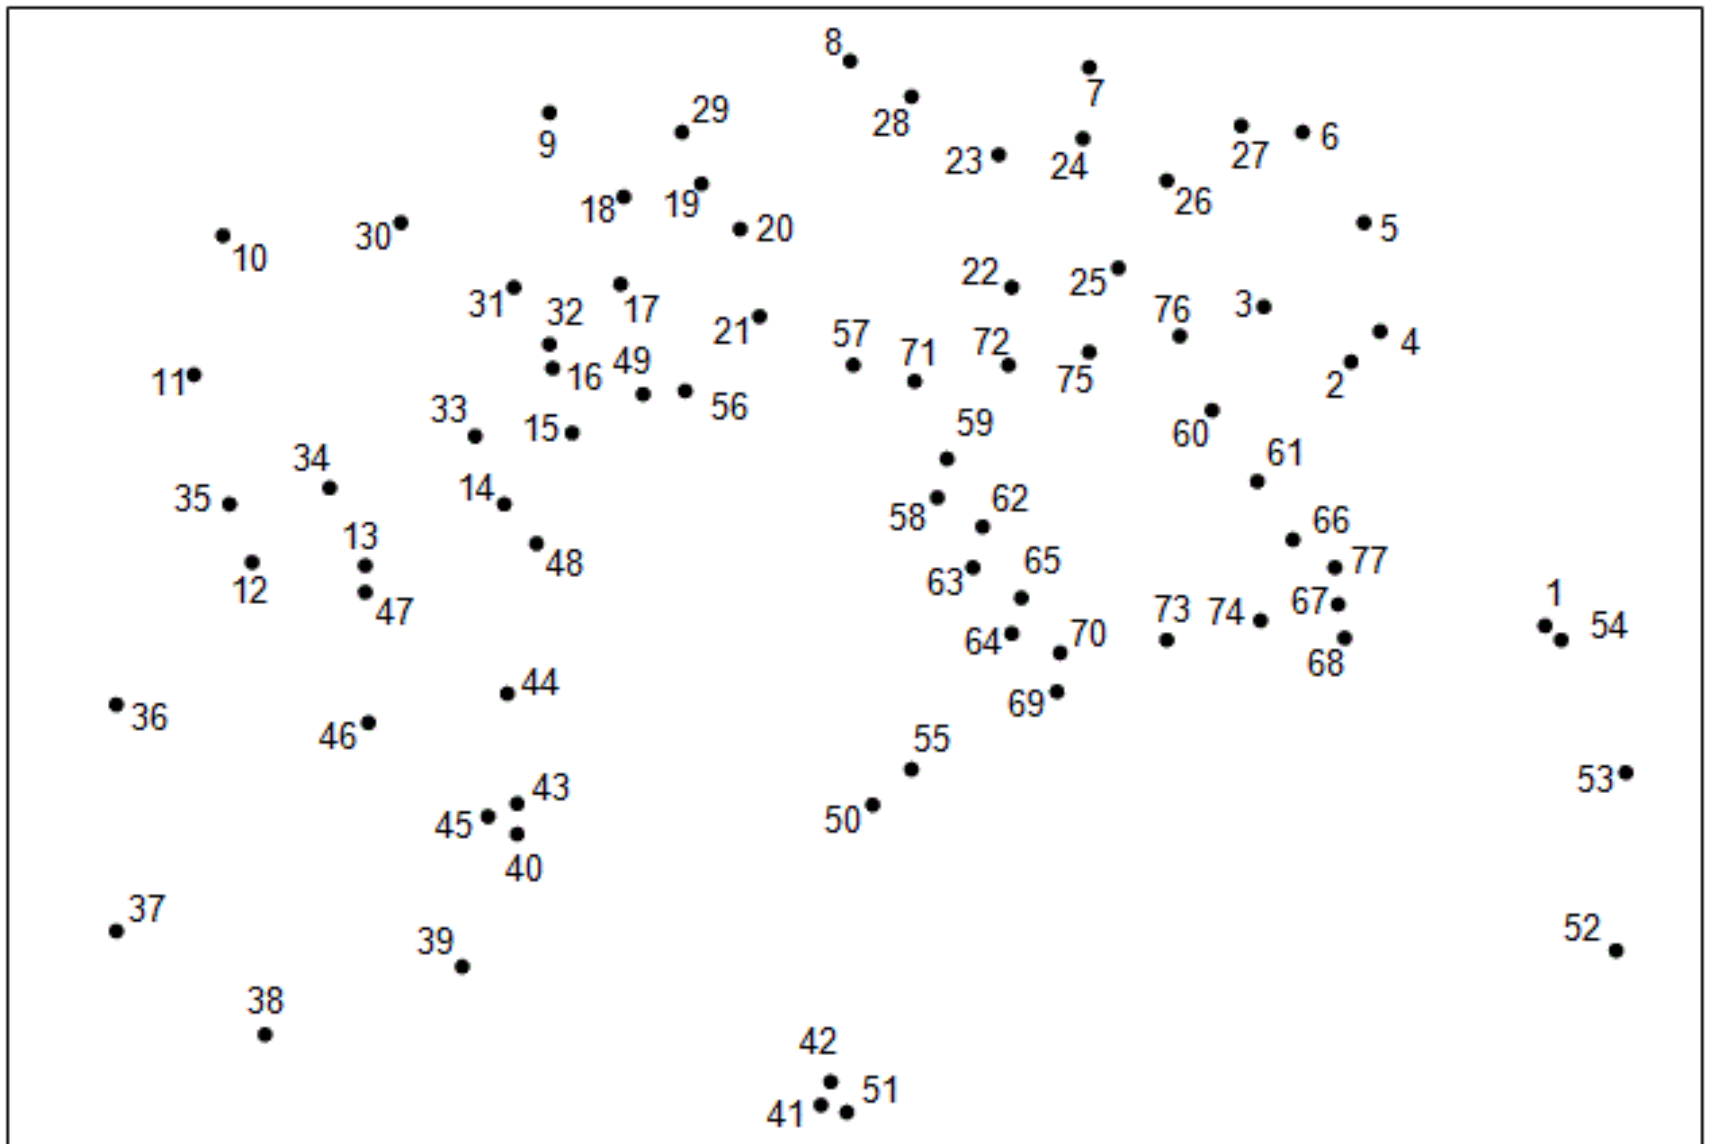

## Idea vs. Concept

A frame or context focuses your thinking and seeing for you; like eyeglasses, you just use it

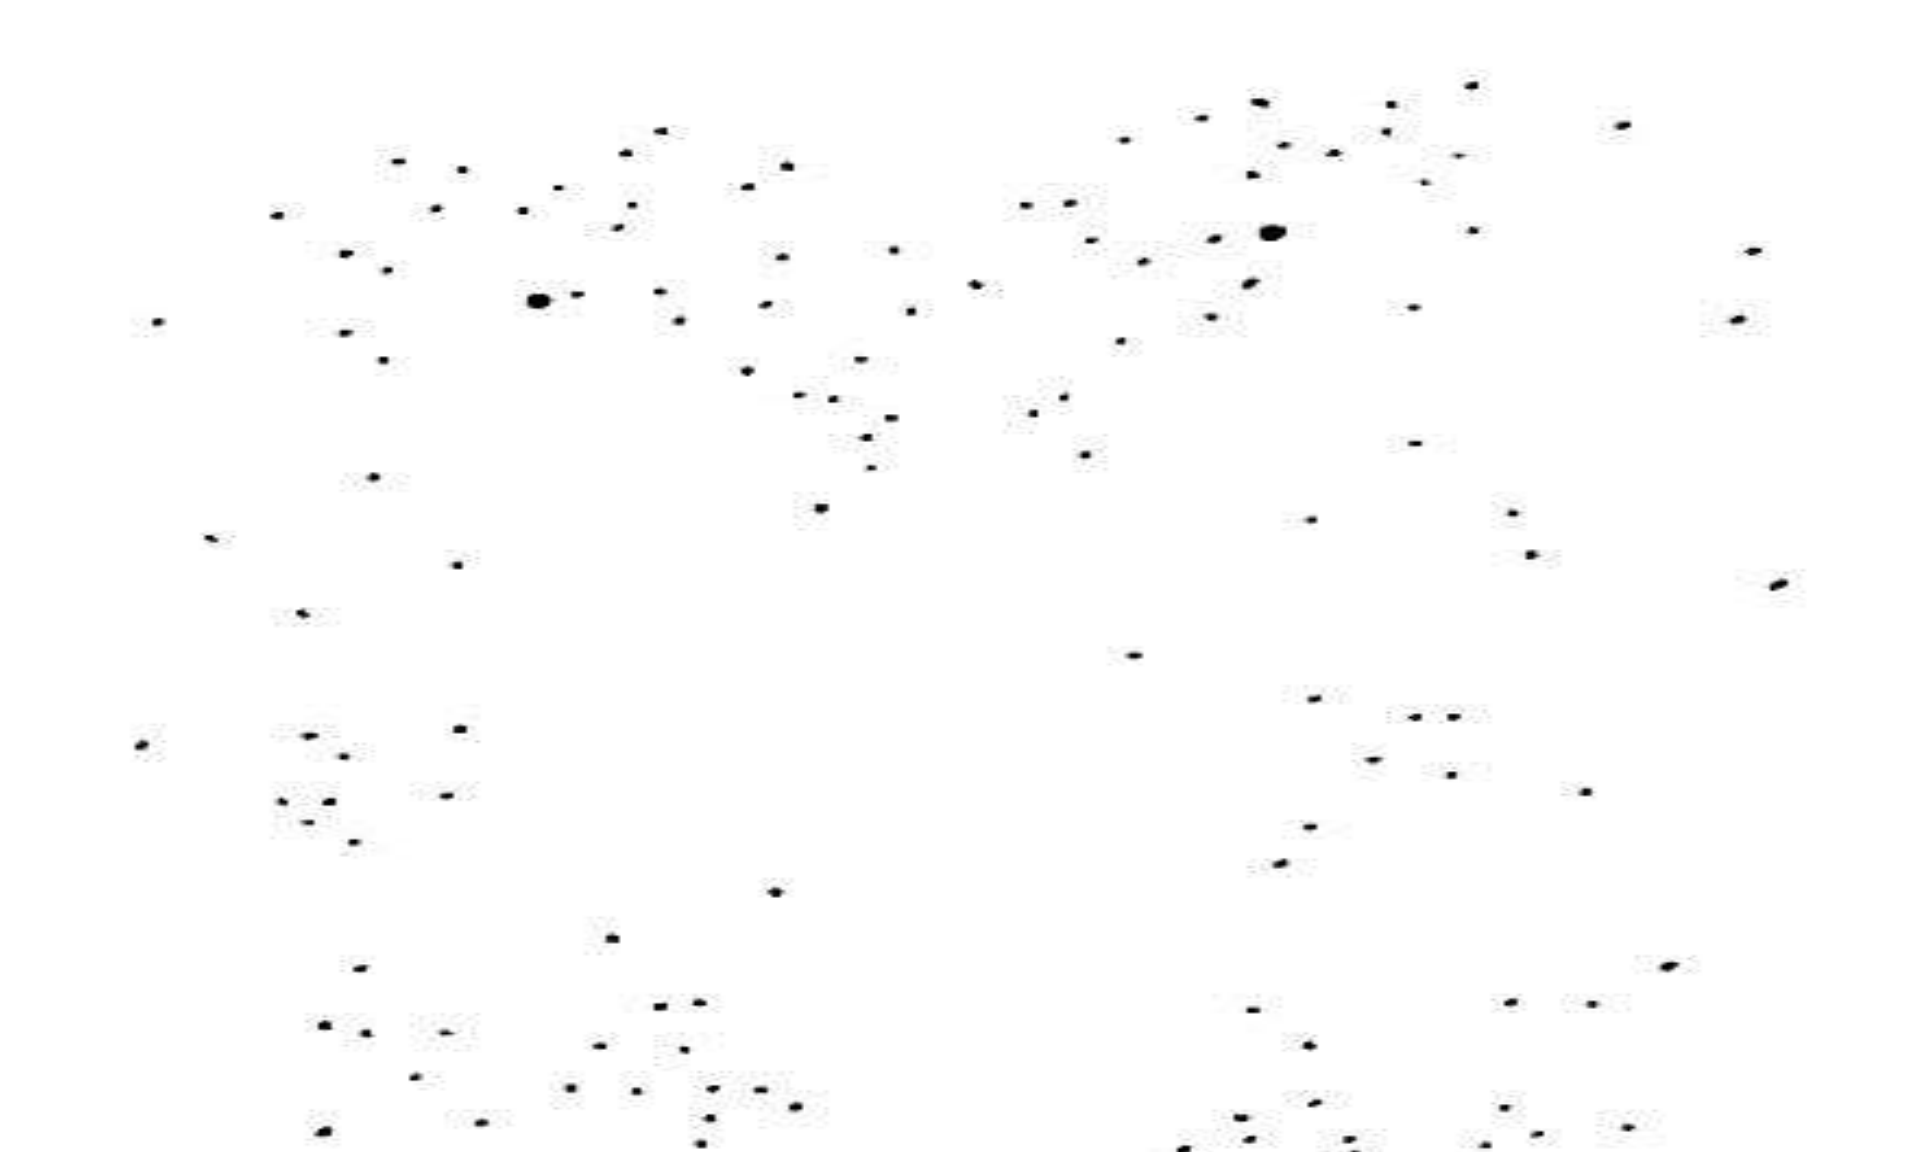

A framework enables you to reason how and why

**Question hierarchies of logic** (explicit/implicit rules for what can and cannot be combined)

Challenge assumptions about how and what to connect  
...and whether it is important and valuable...  
**The Unknown:** Where to start...what is the problem?

Students in So Cute & Creepy place objects in a continuum from cutest to not so cute. This activity will be the basis for a discussion about the aesthetics of cute.

Cuteness is an Unknown  
in this context – what  
are the parameters?  
Constants? Variables?

White Painting project  
Painting So Cute and Creepy, Spiral Workshop 2007

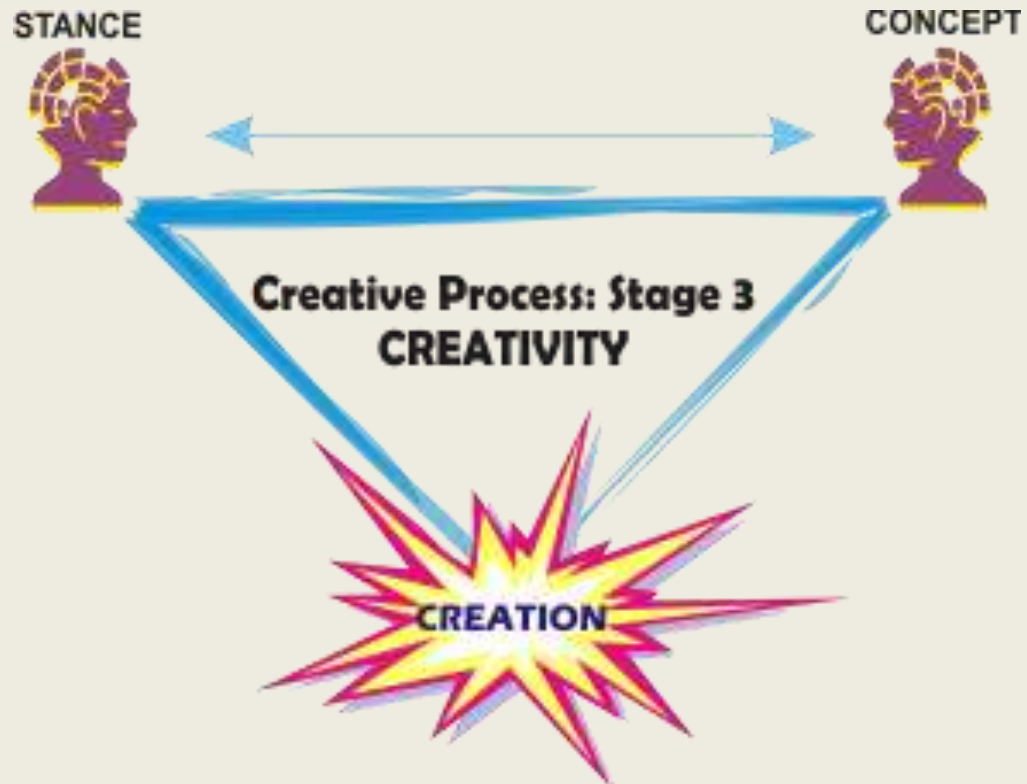

# Question and Connect

- Update the myth of Icarus. Is there a dangerous dream of progress in the modern era that can be used as a cautionary tale? Use elements from both the ancient myth and its modern parallel in your artwork.
  - Source material: Myth
  - Strategy: Questioning/Critiquing
  - Hint: Perhaps the dream of nuclear energy or some other modern panacea might be used.

**Common Core: Interpret, evaluate, adapt, determine a new structure for artistic expression...all in the context of the unknown**

**Problem is predetermined – but process and product are open-ended and unknown**

## Voice and Vision

How a creative stance generates new knowledge.

# We are asking students to:

- Take risks
- Reframe how you think
- Question, challenge assumptions
- Reveal and exploit hidden systems of logic and value

# Finding Your Voice and Vision:

- Furnish a unique mental space with your own:
  - Goals, problem finding
  - Motivation
  - Point of view
  - Preferred process, materials
  - Standards of excellence

**Creative  
Mindset**

## COMMON CORE:

Developing a new point of view that  
leads to original analysis,  
determines new expressive structures  
and integrates where no connections  
used to exist...

These cognitive skills are among the  
highest forms of creativity

Download  
article on  
our Model

A creativity model and matrix are presented to help art educators teach and assess creativity as an important skill, and relay its importance to stakeholders.

# Leading Change:

## The Art Administrator's Role in Promoting Creativity

.....  
RAYMOND E. VEON

**W**hat role can district visual art administrators play in articulating an educationally valuable conception of creativity and in establishing a culture that targets creativity as an educational goal? How can art administrators help teachers implement creativity goals? How can we communicate creativity's importance to principals, parents, and other stakeholders? What tools do we need for long-term, systemic change that supports the development of creativity in schools?

From  
Art Education Journal  
Jan. 2014

In this article I present two essential tools for answering these questions: (1) a model that promotes a common understanding of creativity, and (2) a Creativity Instructional Matrix based on this model that provides a set of detailed objectives

Imagine you are observing an art class. The art teacher explains the assignment, shows a model of what it should look like, and exclaims, "Try anything—use your creativity!" The teacher then turns away, satisfied this will develop creative

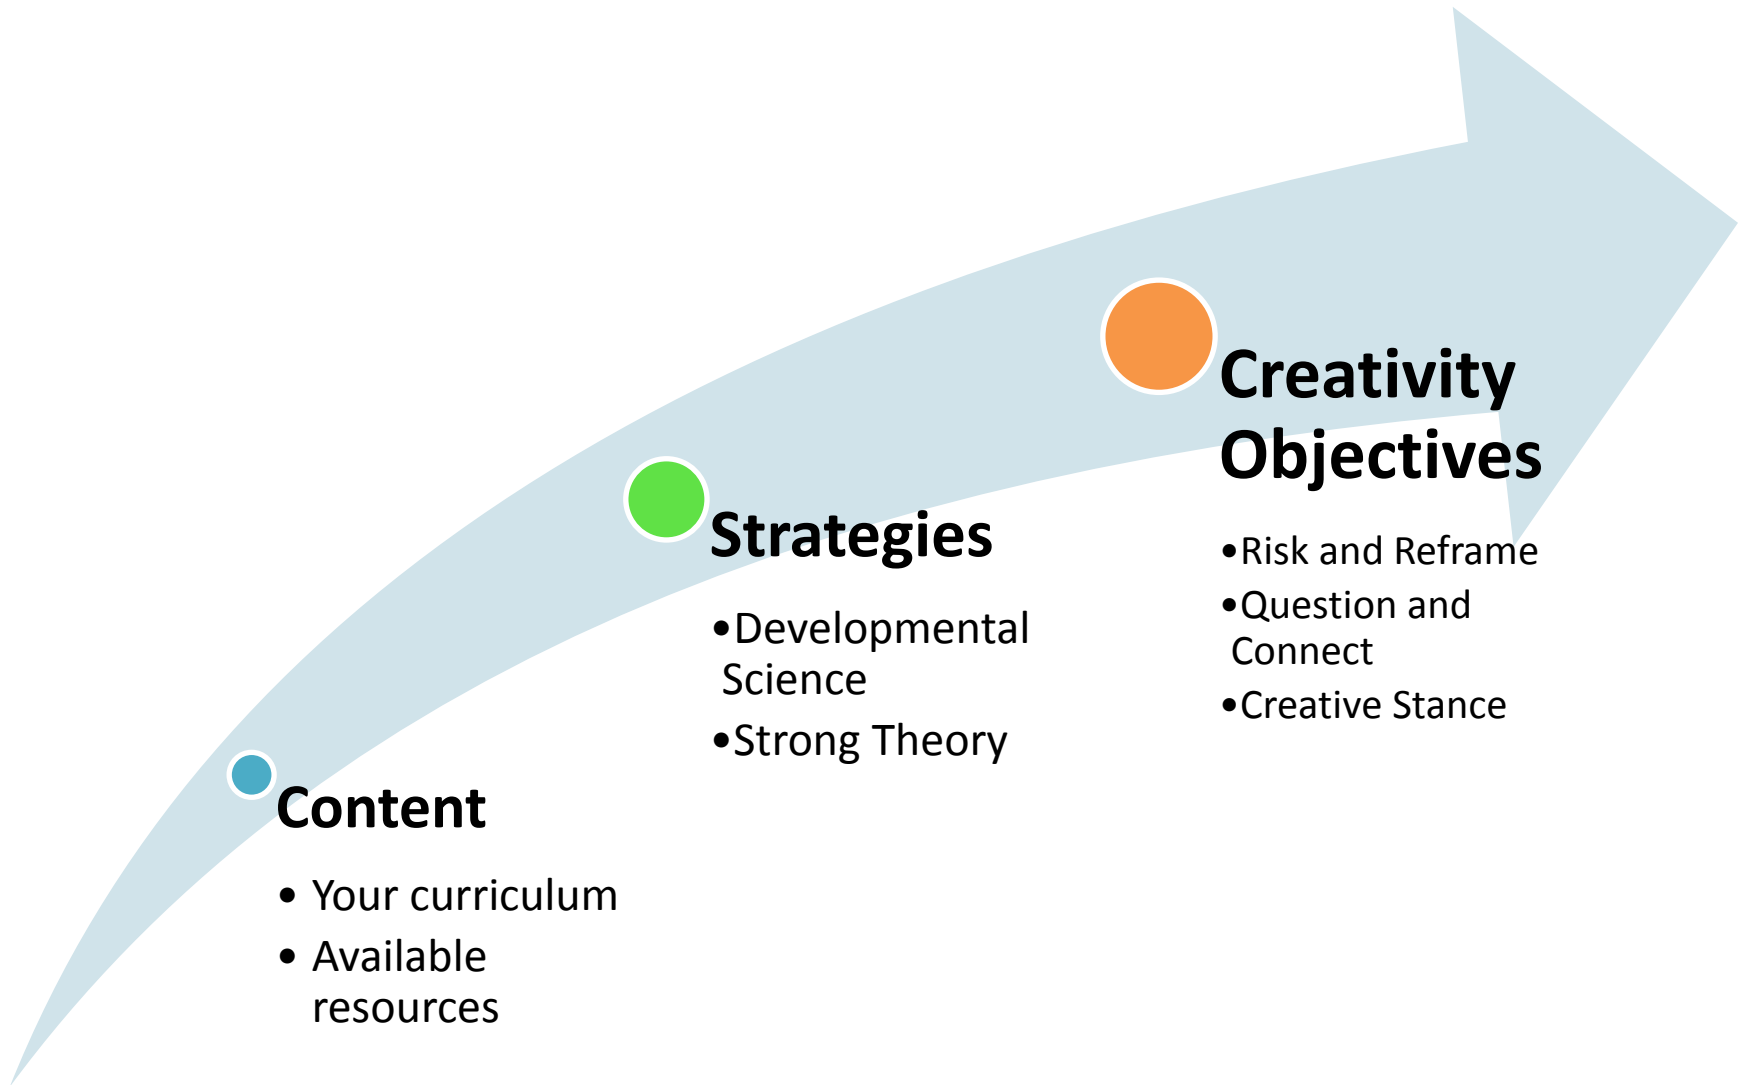

# Creativity “Quick Fix”

Unit/Lesson Planning	Open*	↔	Closed
<b>Problem,</b> Question or Task	Not Provided	Guided	Provided
<b>Process or</b> Strategies	Not Provided	Guided	Provided
<b>Product,</b> End State	Not Provided	Guided	Provided

\* Not determined by teacher/more student choice

Task Design Matrix (Sue Brookhart)

# Creativity Infusion Process

# Creativity Infusion Curricular Framework

	Strategies <small>(small tweaks)</small>
<b>Risk and Reframe</b>	<ul style="list-style-type: none"> <li>Start with a handling collection</li> <li>Start with open-ended image generation</li> <li>Use Art Synectics/SCAMPER to stretch and explore</li> <li>Use theatre, dance, and music exercises to motivate and reframe</li> </ul>
<b>Question and Connect</b>	<ul style="list-style-type: none"> <li>Use Visual Thinking Strategies (min. 1x/month)</li> <li>Start units with 100 Questions</li> <li>Adapt Gude's Spiral "worksheets" to generate thinking frameworks</li> <li>Use dialogue, Socratic seminars</li> <li>Use student-generated problem solving strategies</li> </ul>
<b>Creative Stance</b>	<ul style="list-style-type: none"> <li>Use Stage 3 Guiding Questions</li> <li>Make self-scan a class ritual</li> <li>Let students generate the curriculum</li> <li>Students routinely self-generate project-planning</li> <li>Student goal setting, resource identification, criteria selection</li> </ul>

\* See handout for assessment ideas, approaches, a sample instrument, and research

**Handling Collection**

# Handling Collection

# Creativity Infusion Training

	Available PD Options
<b>Do your own!</b>	Use Model/Matrix as conversation starter*
<b>Up to 1 Day</b>	One person; free (you cover travel costs)
<b>2-3 Days</b>	Team; fee plus travel
<b>Academic Year</b>	Team; fee plus travel

\* Handout has questioning strategies for lessons/units

## Five Core Questions for Creativity Development:

- What more can you do?
- How did you take a chance?
- What can you connect it to? (What more can you add?)
- What is another way of doing it? Can it be better?
- Are you letting your personality come through?

<b>Rubric for Creativity</b>	<b>Very Creative</b>	<b>Creative</b>	<b>Ordinary/Routine</b>	<b>Imitative</b>
<b>Variety of ideas and contexts</b>	Ideas represent a startling variety of important concepts from different contexts or disciplines.	Ideas represent important concepts from different contexts or disciplines.	Ideas represent important concepts from the same or similar contexts or disciplines.	Ideas do not represent important concepts.
<b>Variety of sources</b>	Created product draws on a wide variety of sources, including different texts, media, resource persons, or personal experiences.	Created product draws on a variety of sources, including different texts, media, resource persons, or personal experiences.	Created product draws on a limited set of sources and media.	Created product draws on only one source or on sources that are not trustworthy or appropriate.
<b>Combining ideas</b>	Ideas are combined in original and surprising ways to solve a problem, address an issue, or make something new.	Ideas are combined in original ways to solve a problem, address an issue, or make something new.	Ideas are combined in ways that are derived from the thinking of others (for example, of the authors in sources consulted).	Ideas are copied or restated from the sources consulted.
<b>Communicating something new</b>	Created product is interesting, new, or helpful, making an original contribution that includes identifying a previously unknown problem, issue, or purpose.	Created product is interesting, new, or helpful, making an original contribution for its intended purpose (for example, solving a problem or addressing an issue).	Created product serves its intended purpose (for example, solving a problem or addressing an issue).	Created product does not serve its intended purpose (for example, solving a problem or addressing an issue).

portfolio B

**Students need a long term creative agenda to see the long term benefits of creativity training.**

**If it is sporadic and random, they look back and see it as frivolous and impractical.**

*Capture Queen*

# Understanding the Creativity Instructional Matrix

Please work in small groups and rotate to each poster, adding your thoughts; at the end, all posters are shared.

<b>Creativity Objective</b>	<b>S1.8 R</b> Recognizes that interpretation relies on context (the implicit and explicit cues/clues that suggest how we should assign meaning to something); combines cues/clues from disparate contexts in an artwork to generate unusual meaning
<b>Key Terms and/or thoughts on Creativity Objective</b>	Interpretation; Context; Clues that tell us how to interpret; Fits in to definition of Imagination (Image + Context = Idea); Objective is focused on CONTEXT rather than Image
<b>Fact Sheet Details and Important Research</b>	Conceptual combination bears a special relationship to creativity, having been mentioned frequently in historical accounts of creative accomplishments (e.g., Rothenberg, 1979; Thagard, 1984; Ward, 2001; Ward et al., 1995). In addition, combining concepts is a crucial component in several process models of creative functioning (e.g., Davidson, 1995; Mumford et al., 1991; Sternberg, 1988),
<b>Suggested Activity – What lesson, activity, or experience can you provide students to achieve this creativity objective?</b>	VTS; An automobile made of postage stamps (Check for Stage 1: Does it ask students to risk and reframe?) Are we assessing image transformation, context transformation, or idea generation (image + context)? Is the focus on the transforming and combining the visual structure of cars and stamps, or on the meaning cars/stamps have for us (context), or both (idea)? Cohort-Based Assessment: class sets standards of exploration, resolution, novelty
<b>“Look Fors” - Evidence that the objective is being met (Indicators, Sample Behaviors)</b>	Students are asking questions and talking about the meaning we attach to cars and stamps, not just the visual structure of these objects (“Well, both cars and stamps travel, and some go fast in first-class style, while some go slow”)
<b>“Red Flags” for creativity objective</b>	Students only focused on visual structure, not on meaning
<b>Questions we should expect teachers to ask when helping students meet the objective</b>	Can you combine or recombine the purposes or uses of the parts? Can you take a risk and make it even more different?
<b>Questions we should expect students to ask when meeting objective</b>	What if it was only going to be used by kids instead of grown ups? Will it be sticky on the outside if it gets wet? Could we buy it from a postman instead of at a car dealership? What else could it mean? What more can we find?
